Transforming services

Digital transformation of LD & Autism Services

Heather Cook
Chief Innovation Officer

brainin hand
personal technology for independent living

Technology has the potential to improve outcomes and save costs over the next ten years.

Agenda

- Technology and mobile health – Where are we now?
- Barriers to digital adoption
  - governance & risk management
  - trust & safety
  - systems & process
  - awareness & habit
  - return on investment
- Brain in Hand
- Service user stories

It’s the connectivity of mobile devices which will transform healthcare – the rise of the smartphone

Barriers to adoption

Key challenges to adopting digital technology to transform services
