MANCHESTER CITY COUNCIL

NHS

Context

- Our Manchester
- Health inequalities
- Our vision and plans
- Our Approach
- What we have done so far
- Next steps

- **things you should know :**
- Sets out the 10-year vision for Manchester
- Took two years to produce
- Had very detailed public consultation and support
- It’s not the Council’s vision – it’s the whole city’s vision
- Overseen by the Our Manchester Forum from public, private and community organisations
- Spells out 64 things we're committed to do to make Our Manchester happen (our ‘we-wills')
- Progress is checked in a yearly snapshot report called State of the City

Our Manchester the four principles

Better lives

It's about people

Listening

We listen, learn and respond

Recognising strengths of individuals and communities

We start from strengths

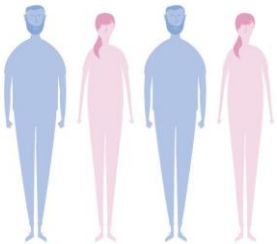
Working together

We build relationships and create conversations

Manchester's Health

Manchester has the highest rate of **early death from respiratory (breathing) diseases** in England. More than 64% of these deaths are considered to be preventable.

Manchester has one of the highest rates of **child poverty** in the country; with just over 32% of children aged under 16 living in poverty, and many live in homes where no-one is employed.



Nearly **4,000** people aged 16–64 in Manchester were long-term **unemployed** in 2014. This was 10.5% of the Manchester population.

In August 2015, there were **2,895** patients in Manchester diagnosed with **dementia**. The vast majority (95%) of these patients are aged 65 and over.

We have the highest number of **smoking-related deaths** in the country. Each year there are some 735 deaths and 4,760 hospital admissions due to smoking

Some 350 people under the age of 75 die from **cardiovascular (heart) disease** in Manchester each year.

Vision: A Healthier Manchester

Manchester is the fastest growing city in the UK in terms of economy and population but we need to do better to connect growth with reform and our residents.

Where are we now?

Outcomes

8.5
Years difference in life expectancy in males between most and least deprived areas

3,150
Alcohol-related harm hospital stays per year

735
Smoking-related deaths per year

24%
Of children classified as obese in Year 6

Finances

£134m
'Do nothing' funding gap for Manchester CCGs, providers and local authority by 2020/21

System

14% of the Manchester population account for **44%** of all secondary activity and **95%** of residential and nursing care activity

The Manchester Locality Plan

Where do we want to be in 2021?

Fitter, healthier and more resilient population

- Reduced all cause mortality rate
- Decreased variation in health outcomes across all localities
- Reduction in under 75 preventable mortality rate from respiratory disease

High standards and quality services

- Reduced non-elective hospital admissions / readmissions
- Improved transition of care across health and social care

Financially rebalanced and sustainable system,

- Increased spend on community services and decreased spend on secondary care hospital services
- Eliminating the funding gap

The vision: Manchester people living longer and better with a transformed and integrated health and social care system; receiving high quality, affordable and joined up health and care support; and supported and encouraged to do what they can to remain healthy.

Strategic Objectives

Ensure services are safe, equitable and of a high standard with less variation

Improve the health & wellbeing of people in Manchester

Enable people and communities to be active partners in their health and wellbeing

Strengthen the social determinants of health and promote healthy lifestyles

Achieve a sustainable system

GM Health and Social Care Partnership
(Transformation Fund supporting Manchester's plans)

Manchester Health and Wellbeing Board
(chaired by leader of the Council)

Manchester Investment and Transformation Agreement

Single Hospital Service
